## November Meeting Women's Institute

The November meeting of the Champion Women's Institute will be held at the home of Mrs. P. O. Sommers on Tuesday, November 8th, at 2:30 p.m. Mrs. Alexander will read a paper on "Why Disarmament Conferences Fail" and Mrs. F. Alcock will give a summary of Current Events for the past month. Refreshment convener—Mrs. Manhard. Roll call—Famous Women in History. The president would be pleased to see a large attendance of members and friends of the Institute.

## Curling Club Elects Officers

A meeting of the Champion Curling Club was held on Friday evening October 27 in F. Clapp's store with a good attendance.

The following officers were elected:

President—J. S. Collins.  
Vice Pres.—H. T. Lamont.  
Hon. Pres.—A. E. Woodbush.  
Ex. Committee—Roy Hummon, A. Baker, H. T. Lamont.  
Ice Committee—C. McLean, Frank Clapp.

Official Umpire—P. Gatenby.  
A meeting will be called at a later date to discuss further details.

## Halloween Party

The pupils of the grade VII and VIII room gathered last Friday night in the basement assembly room of the school for their annual Halloween Party. Games of all kinds, including a treasure hunt, were indulged in until about 10:30. After that a lunch was served. Owing to the lack of time costumes and decorations were dispersed with but everyone seemed to enjoy themselves.

## Badminton Club Commences play

The formal opening of the Champion Badminton Club took place on Wednesday afternoon at the Community Hall, when forty members participated in the various games. The club was officially opened when the president, G. M. Campbell served the first birdie to the vice-president, Miss Melita Fath. Tea was served during the afternoon, with Miss Melita Fath as hostess, as assisted by several lady members. The club appears to be in for a very successful season.

## Give the Boys a Boost

Buy a ticket for the Junior Hockey Club Armistice Dance. The ticket admits you to the dance and also a chance on a door prize. You'll enjoy the novelty dances and it should also be an enjoyment to help the boys out by buying a ticket. The club is endeavoring to raise enough money to buy sweaters etc., so don't turn the boys down when they come around with a ticket.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist of 224-8th Ave West, Calgary, will make his monthly visit to Champion, Friday, Nov. 25th, at the Drug Store.

## Local & General

Mr. and Mrs. Guy Volsey were Calgary visitors last week.  
Dick Howe and Walter Becker were Calgary visitors this week.

Miss Sarah Fleming and Miss Emily Sanderson motored to Lethbridge Saturday.

Lost—Truck license No. 9 545 Finder please return to Chronicle office.

Mr. A. McCullough and Rev. P. Dawson were Calgary visitors last week.

J. D. Henderson was a Lethbridge visitor over the week end.

Mr. and Mrs. Louis Fath moved into Champion for the winter months on Friday.

Mrs. J. Buchan and son of Stirling are spending a few days visiting friends and relatives here.

Mr. J. Volsey, who has been visiting here for some time left recently for his home in Vancouver.  
Personal Christmas Cards! See our new samples, Better Designs, Better Greetings, Lower Prices, at the Drug Store.

I. Ditto and family have taken up residence in their home in Champion for the winter.

Mr. and Mrs. J. S. Collins and Mrs. G. Orr were guests of Mr. and Mrs. Gussick at Warner on Sunday.

Harry Strauss, Cyril Beingsen, Frank Benninger and Leo Strauss left Friday morning by car for Ontario.

The Halloween dance held Friday night in the Community Hall, under the patronage of the W. I., was fairly well attended. Those present report a real time.

Miss Florence Woodbush left Saturday for Regina where she will take Post Graduate work, in the Regina General Hospital.

Miss Jean McEwen, formerly of the staff of O. Taylor's store at Carmangay, will take the position vacated by Miss Barrett at McCullough's.

G. Dupes and A. Ruggies, who were recent hunters at Lake Newell, returned with two geese and several ducks. Outside of being mighty cold the boys report a splendid trip.

Mr. and Mrs. A. Seigel and family returned this week from Minneapolis, Minn. where they have been visiting Mrs. Seigel's parents. Russel Lane and Miss Lane, nephew and sister of Mrs. Seigel accompanied Mr. and Mrs. Seigel on their return.

Miss Truex, who has been the guest of Mrs. Williamson, left for Coronation where she will visit friends for a few days before leaving for her home in Brantford, Ontario.

## Soil Moisture, the Limiting Factor in Grain Yields

Experiments on soil moisture, conducted at the Dominion Experimental Station, Swift Current, Sask., have revealed some surprising facts on the vital importance of moisture in the production of grain. Grain sown in many sections of the prairie rarely receives sufficient moisture to promote a normal growth. The prospect of heavy yields is frequently spoiled by spells of dry weather as the season advances.

Grain crops can use water, during their growth, at a surprisingly rapid rate and in considerable volume. During the past season at Swift Current a crop of wheat used a total of eighteen and a half inches of water. Eight inches of this came in the form of rain during the growing period and the balance was present as available

water in the soil. The rate of use of water by the crop was at first quite slow; for the first two weeks after emergence it averaged the equivalent of six-hundredths of an inch of rain daily. This rate rapidly increased with growth and reached a maximum of forty-eight-hundredths of an inch daily during the week commencing on June 18. In this week the crop used water equivalent to forty-three per cent of the total rainfall. After July 20 the rate of use of water fell off rapidly and at harvest was again only six-hundredths of an inch daily.

The foregoing is an example of a crop produced under almost ideal conditions. Much less favourable conditions existed for a crop sown on land closely resembling summer-fallow in the field. This crop received the same amount of rainfall, but only the equivalent of three and one-half inches of water was available in the soil. Until June 15 both crops used water at the same rate. From this date the growth was noticeably different. An examination of soil moisture conditions showed that in the seven day period from June 15 to 22 the crop on summer-fallow had used forty-eight per cent of its total moisture reserve, while by June 22 only a very small quantity remained.

What crops, when subject to deficient moisture conditions, pass through so-called critical periods when the situation of sufficient moisture definitely depresses the yield of grain. In the cases quoted the first crop was also time subjected to any critical period. The second crop, corresponding to that sown on summer-fallow under field conditions, was undoubtedly severely injured during the week ending June 22. At this time, with no rain and depleted soil moisture, it was impossible for the plants to secure sufficient moisture to function normally. Although heavy rain occurred early in July these failed to offset its injury previously sustained.

## Russian Conditions Unfavorable

Russia continues to experience much difficulty in collecting wheat from state farms and seedling of winter grains is still below a year ago and two years ago. Europe despite of receiving any substantial quantities of Russian and Balkan wheat this season. Ordinarily this information would have caused prices in other supporting countries to advance, but with a super-abundance of wheat in Canada and the United States, it is very unlikely that the world market will be affected by anything less than a crop failure in the Argentine or Australia.

# British Museum Has Most Amazing Collection Of Old Newspapers Ever Assembled

Can you imagine coming downstairs one morning, getting your newspaper from the veranda and over your grape fruit reading the current news for the first time in history a locomotive had run on rails drawing 18 coaches at the staggering speed of 12 miles per hour?

The British Museum has just opened a new branch for the storing of its collection of newspapers, the most amazing collection in the world. In this new building is housed a copy of every newspaper—British, Dominion and foreign—published since the year 1800.

The enormous output of literature of every kind has made this new building a necessity. The British Museum endeavours to obtain a copy of every book printed, from multiplicity of tables and bed-time stories to the ten-man Epic of Elmer G. Loring and the novels of Elmer G. Loring. There was no room for the books and newspapers as the latter have been given a new home.

The new building is located at Colindale, near Hendon, some 10 or 12 miles from the Museum itself. It is of concrete and steel with brick veneer and cost over \$300,000. It already contains 275,000 bound volumes of newspapers weighing 20,000 tons. They occupy 15 miles of shelves. There is still room to absorb the world's output of newspapers for the next 50 years.

The reading room is 87 by 30 feet with sitting room and ample desk accommodation for 50 readers. The work of binding is done on the premises by the museum staff.

The building is open to the public. Application has first to be made and a list of admission obtained. Armed with this, anyone can walk in, fill up a form and in a remarkably short space of time any newspaper required is laid before him.

It is an indescribable experience to read as red-hot news what we all once had to learn laboriously as history. These papers go back to the Battle of Trafalgar and beyond; the escape of Napoleon from Elba, his defeat at Waterloo, the abolition of slavery throughout British and later, American possessions; the death of George the Fourth; William of the same regal number, Victoria the good and Edward VII, the crossing of the Atlantic by the first steamer, the inventions of a thousand and one miraculous things which are commonplace today; the institution of penny postage, Franklin's ill-starred expedition to the Arctic, the proclamation of a republic in France, wars by the score.

From a historical viewpoint probably these newspapers have little value, history being what it is, in perspective, but at least they do portray current thought at the time events which have since become history were actually taking place. What a tragedy they do not look further still. Think of the thrill of reading, say, the news of the death of Cleopatra—"Queen of Egypt, mighty, famous beauty succumbing to asp bite"—would make telling headlines.

Then the dead, inconceivable in her grief at the death of Anthony, Cleopatra decided to end her life. Dismissing her servants and accompanied only by her favorite asp she retired to her couch. She was found later, by a servant who gave the alarm. The court physician diagnosed the case of death as snake-bite.

The paper's medical correspondent would then describe for the benefit of the uninformed, the precise effect of a bite in the bosom. Alas there is no such newspaper in existence.

But the collection of newspapers which is gathered here must cause politicians a lot of uneasiness. They can always be confronted with what they said in a moment of exasperation or in the days before they turned their political coats inside-out.

There is no point in the question as to what Gladstone said in '84. The answer is on file. Gladstone, being dead, can never claim to have been mis-reported.

**Record Sugar Beet Crop**  
The largest crop on record, the yield of sugar beets grown this year in the province of Alberta, Canada, is estimated at nearly 130,000 tons from which about 30,000,000 pounds of sugar will be produced with several hundred tons of molasses.

Mountain goats are classed as the rarest and wildest of Rocky Mountain game.

W. N. U. 1966

## The Canning Season

Thrifty Housewife Will Store Away Fruits and Vegetables For Winter

A timely suggestion comes from the Dominion Fruit Branch at Ottawa in the form of a message which has real appeal to housewives all over Canada, whether in the farm home or in the city. We all know the difficult straits in which many of our fellow citizens find themselves as a result of conditions entirely beyond their control. With a wealth of fruits and vegetables available at lower prices than for many years, and with other necessary things such as sugar and containers equally available, there should be no need to elaborate about a ready response to the appeal "Just can a little more, if you can, when you can."

## Mystery Chest Opened

Left By Bishop Has Mocked Inquid-ious For 22 Years  
The "mystery chest" left by the famous "heretical" Bishop Colenso with instructions that it should not be inspected until the last member of his family has died, has at last been opened.

For 22 years the chest stood in St. Mary's church at Marburg, Natal, S.A., mocking the inquisitive. Government and church officials crowded around when it was opened. Only an ant's nest and a piece of red cloth were found inside.

**Winning Newspaper Union**

## PRIEST RUNS A TOTÉ CLUB

A toto club organized by a Roman Catholic priest, Father Carless, of St. Ann's Church, in the heart of London's dockland, has a membership of 1,300, including 200 women. Father Carless considers betting a legitimate pastime, and as nearly all the members back horses and dogs, he wishes them to get as far a chance as possible. The profits will be used to pay for the club first and later to improve their social life. Father Carless is shown at the toto table paying out.

## Prairie Wheat Crop

**Bank Of Montreal Report Places Yield At 415,000,000 Bushels**  
Taken as a whole, the principal field crops of Canada have seldom attained such total volume as during the present season or been of a higher quality. Yields were generally satisfactory in each of the provinces, despite sectional reverses due to weather conditions or other causes. A preliminary estimate of the Dominion Bureau of Statistics placed the total yield of wheat in the prairie provinces at 445,000,000 bushels but from latest reports a total of around 415,000,000 bushels is now anticipated. Even so, the yield is well in excess of the ten-year average and the largest crop since 1928.

Last year's prairie crop was approximately 300,000,000 bushels. The wheat marketed to date has graded exceptionally high and tests indicate that the high protein content will be maintained. The western oat crop is estimated at 274,000,000 bushels against 183,700,000 bushels last year and the barley crop at 70,000,000 bushels as compared with 50,500,000 bushels.

## Severe Test For Firemen

**Milan Brigade Called Out To Stop Flood Of Molten Glass**  
The ingenuity of the Milan Fire Brigade was put to a severe test when firemen were called out to stop a flood of molten glass.

One of the sides of a huge furnace tank in a glass factory suddenly gave way and immediately the whole floor of the factory became flooded with liquid glass.

The workmen all managed to escape, but could not stop the flow from the tank, and the transparent lava sprang to the doorway, into the street, and down stairs to the cellar of the factory.

The Fire Brigade sent for large supplies of ice, with which the firemen solidified the creeping margins of the glass. They then turned to the flaming bulk itself, hosed it with lead water, and gradually made it all solid.

Next day, with the factory very much under glass, the second phase of the work was begun—the liberation with pick and hammer of the densely encased premises.

Workmen's jackets and other personal belongings were visible in the glass as if preserved in ice.

**LITTLE JONES (to hobo):** "You run a great risk, my man, soliciting alms. How do you know you are not addressing the Chief Constable of the city?"—London Opinion.

# Eight Points The Careful Driver Will Observe In Order To Decrease Motor Accidents

## For Auction

**Collection Of Arctic Timber-Wolf Skins Sold In Winnipeg**

A collection of 247 Arctic timber-wolf skins was sold by auction in Winnipeg recently, the outstanding feature of the Dominion Fur Auction Company's October sale of raw furs. The skins were the property of the Dominion Government and on each one of them a bounty of \$20 had been paid to the trapper regardless of its size or quality. A substantial portion of the pelts had been taken from small pups and the average price realized was consequently lowered considerably.

Prices ranged all the way from 25 cents for small damaged skins up to \$250.00 for large sizes of good quality. The collection averaged \$11.

A collection of late-caught beaver ranging between \$11 and \$17.50 and averaged \$5.55 according to five per cent. higher than the prices realized in August. Cross fox sold unchanged at five per cent. higher, realising from \$1.80 for badly rubbed skins up to \$7.00 for good specimens.

The musk collection was very springy and prices realized were quite representative. The range was 25 cents up to \$5.00. Red foxes were in poor demand and mostly bought back. Muskies were all bought back.

White foxes brought around \$18 for ones and two with average Mackenzie River and Chesterfield inlet lots bringing from \$16 to \$18.75, unchanged from the August level.

Marten averaged 10 per cent, ranging up to \$21.50 and averaging \$10.50. Otter was in poor demand and sold unchanged, the range being from \$2 to \$16.

A collection of 2,500 weasel attracted fair demand, advancing about five per cent. Prices ranged from 25 per cent. up to 82½ cents and averaged 50 cents for the skins sold.

Ordinary furs declined about 10 per cent., ranging from \$8.25 down to \$2.75 and averaging \$5.00.—Manitoba Free Press

## Making Air Travel Popular

**Sweden's Aero-transport Company Find Ways To Stimulate Business**

In spite of the depression there was an increase of about 50 per cent. in the number of passengers on Sweden's continental air lines during the first six months of this year according to a statement by Captain Florman, head of the Swedish Aero-transport Company. About 75 per cent. of the passengers are business men who are attracted by the saving of time in transit and by the safety and regularity of the aerial traffic. The former line of transit between Malmö and Paris in eleven hours was this year brought down to seven hours, and will next year be further reduced to about five hours, thanks to the fact that the company will be served by "planes to eliminate the previous luncheon interval at Amsterdam. Other novel features are the facility for the passengers to send private radio messages while in the air and the introduction next year of special night planes with sleeping accommodation for the passengers.

As a further stimulant to the interest in using the air lines the Aero-transport Company has now reduced the fares of the Baltic Air Express by 25 per cent. on the Malmö-Paris stretch so that the cost approximately corresponds to the second class railway fare.

## Trade With France

Expectations for a new trade treaty between Canada and France are expected to open shortly. Hon. C. H. Caneva, secretary of state in the Dominion Government, returns from Geneva soon, where he was Canada's delegate to the League, and it is anticipated preliminary conversations will begin there. French authorities are understood to be favorable.

## Germany Buys Our Rails

The largest market for Canadian rails, states a report of the Department of Trade and Commerce, is in Germany where considerable quantities are shipped annually. A cargo of 50,000 pounds of rails the second largest shipment this season, has started the trade for the present season.

The smallest fog particles have been measured at the Massachusetts Institute of Technology. It was found that 25,000 of them could be placed on the head of a pin.

## May Investigate Coal Prices

**Canadian Fuel Board Has Been Requested To Act**

The Canadian fuel board has been requested by Hon. W. A. Gordon, Minister of Mines, to enquire into and prepare a memorandum of the facts on coal prices in Canada. Official announcement to this effect was made by the minister.

Action is being taken on recent suggestion that coal prices were somewhat high. The question engaged the attention of the senate recently when Rt. Hon. Arthur Meighen suggested that the board might undertake an inquiry into this matter.

In the senate, the question of coal prices arose when Hon. Cairine Wilson, Minister of Education, cited in a Toronto newspaper which had alleged the existence of a coal combine in British anthracite.

"I believe in love at first sight. I have experienced it myself ten times lately."—Lustige Riste, Leipzig.

## Fragrance Sealed in Metal

TEA

"Fresh from the Gardens"

Lest We Forget.

Fourteen years have come and gone since that momentous eleventh hour of the world today, for the eleventh month of 1918, when the armistice which ended hostilities in the greatest war in the history of mankind became effective. Once again the people of Canada observe "Remembrance Day"—a day on which they pay tribute to the memory of the thousands of their fellow citizens, men and women, who gave their lives in a cause which to them, and to us who survive, was a sacred, a noble cause, namely, a war to end war.

But as we look back over those fourteen years, and as we view the state of the world today, we are perplexed as we seek an answer to the question: Has war, after all, been ended? We are disturbed and suffer inquietude as we contemplate the present world situation. Were the sacrifices of 1914-1918 all in vain? Is something worse to follow?

The nations of the world have not disarmed; quite the reverse is true. Armaments are greater and more deadly today than they were in July, 1914. There have been numerous attempts to reduce armaments, but none to do away with them altogether, and the attempts at reduction have been feeble and for the most part ineffective.

Under the terms of the Peace Treaty Germany was disarmed, and her allies reduced to a position of impotence for the time being. But in disarming Germany, the Allies actually agreed to bring about world disarmament. They have failed to do so, and now Germany is installing one of two things, either that the Allies proceed to disarm or that Germany be permitted to re-arm. The German demand is a reasonable one. The Allies cannot expect to hold a great, grand and powerful people in the position which the German people are forced to occupy at the present time.

What is to be the outcome? Will the Allies at last make a real, a determined, an honest attempt to disarm? If they do not, will they either have to agree to the re-arming of Germany, or that country will proceed to re-arm without their consent, and who will stop her?

But did the World War end? As a matter of fact, it is not the war still in progress, but in another form which is bringing ruin upon all nations and imposing huge and incalculable losses and intense suffering upon millions of people? The weapons now employed are not bullets and bombs and bayonets, but extreme national policies of many kinds—restrictive trade measures, prohibitive tariffs, trade quotas, immigration quotas, with each nation striving to promote its own interests by working some harm to other nations. Where do we find two nations working in cordial co-operation to advance, not only their own welfare but the welfare of each other, and the world at large? Rather, are not the nations engaged in waging war upon each other actuated solely by the motive of the survival of the fittest?

Narrow nationalism kept alive by, and in turn keeping alive, racial and religious suspicions, passions and bitterness, rules today, with every nation excusing its own selfishness, its own narrowness and bigotry, on the ground that other nations started on that line, and that they are that they are merely providing needed self-protection for themselves.

So we find Russia, while teaching its farmers and workers how to build and use tractors, at the same time instructing them in the mechanism and operation of tanks for use in war. We find democracy overthrown in Italy and a war-like dictatorship set up. Fearing each other the countries of Europe adopt policies the result of which is ruin to the agriculturists of Canada, the United States and the great food exporting countries of the world. The United States and France grab all the gold in the world and store it away in vaults indifferent to the fact that thereby they bring financial chaos upon the world. Each nation is out to kill the trade of all other nations, and they have succeeded to the extent that tens of millions of men and women are thrown out of work.

It is a disheartening picture, and no one nation seems to have the courage to face it, grapple with it, make a break in the vicious circle, and attempt to cut the circles which are throttling and strangling mankind. Instead, the old, threadbare excuse is given and acted upon, "the other fellow is doing it, he is to blame, and I must follow suit or be submerged."

If this attitude is maintained much longer complete world collapse is inevitable. Conditions resulting are not only a threat to the nations which thrive and grow apex. All the enemies of law and order, all the fanatics with pet but unsound theories of their own, are preying upon the public in all countries, promising to create utopias if the people will only arise en masse and destroy everything now existing and which has been built up out of the labor, the experience, the sufferings of the generations of the past.

It is the whole system that is wrong, so these agitators declaim, but nothing is quite so wrong as such statements. It is not the system that is wrong, although like all other things it must constantly change and improve in an ever-changing world to meet conditions as they, too, change. No, the fault lies in the hearts and minds of people themselves. They still maintain their old suspicion and dislikes of each other, they hate any race and language but their own, they scorn any religion but their own; each nation suffers either from fear or a superiority complex because one or the other is the predominant trait of character of the individual men and women who make up the nation. It is the individual view which finds expression in national policies.

Many of the politicians and statesmen of the world, the men chosen to direct national and international policies, realize the situation and left to themselves would be able to accomplish much to remedy it and render the danger which is imminent, but their people will not support them; the masses would sweep them aside and put others in their place to continue to insist upon policies of extreme narrow nationalism. It is in their own suffering they are thus determined to find their ultimate undoing and what they will bring about, unthinkingly, heedlessly, and from purely selfish motives.

## New Source of Revenue

Enterprising salesmen of London, England, combined pleasure with business this year by leading their wives with dresses and lingerie, which they sold to people at the rural districts during vacation trips. Two little girls who started on a tour through Yorkshire sold out their stock within a week.

## Easy To Figure Out

"I suppose," like many other husbands you can't say what your wife wants for her hats and dresses." "Oh, yes, I can—too much." "But joking aside, how do you ever stop to figure out how much your wife's clothes cost you?" "It isn't necessary. I simply add my income to what I owe."

## All Her Children Were Troubled With Diarrhoea

Mr. J. J. Bickert, R.R. 1, Enderby, B.C., writes: "Last summer all my children were troubled with diarrhoea, and were so 'fed' that I did not know what to do. A friend told me to give them Dr. Fowler's Kidney & Bladder Pills, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

## British Scientists Make

## Remarkable Discovery

Find Waterborne Cause Of River

A remarkable discovery was made by British scientists in the Edinburgh and Oxford district of Kent and Surrey recently. Quite unexpectedly, the waterways in this area were rapidly being turned black, and it was alleged that pollution from sewage farms was the cause.

As a result, the department of botany of the British Museum was invited to probe the mystery. Samples of water were taken from the streams at various points and analyzed, when the sewage farms were exonerated, and the same ingredients were present both above and below the outfalls.

It was then noticed that paths and roads alongside the streams, and overhanging the water, were covered with a sooty material consisting of partially digested leaves which had been devoured by millions of cat-rpillars of the green oak moth.

By a very odd coincidence, this substance, washed down by natural drainage, had combined with water with certain salts in the stream water, and the result was the manufacture of a natural ink.

This insect is quite capable of destroying an oak forest, but fortunately there is a natural check in the shape of a birdless fly known as the cecropia, or little hawk fly, which preys on the adult moths and is thus of immense value in saving thousands of pounds worth of native timber.—Tit-Bits.

## World's Grain Show

British Empire Farmers Co-Operative To Show At Regina

The Empire Farmers Co-Operative Limited, will be represented both by exhibit space and by delegates to the world's grain exhibition and conference opening at Regina in July next year, according to a cablegram received at a technical school, site of the exhibition and conference.

The Right Hon. Lord Strathclyde, chairman, who with two of the directors will attend as delegates, expressed the opinion that an excellent opportunity is thus provided to meet, to confer with and to present the scope and advantages of the Empire Farmers Co-Operative to farmers of all parts of the Empire. Exhibit space in the new grain show building has been booked for the organization.

This will be used for the presentation of such matters as may be of interest to farmers and for convenient distribution of literature.

## Technical Education

Explains Delay In Giving Effect To The Vocational Act

"Some delay has occurred in bringing the Vocational and Technical Education Act into effect by reason of the fact that the necessary regulations governing the act are still under consideration by government," reads the communication explaining the status of this legislation from Hon. W. A. Gordon, Minister of Labour, to the House of Commons. The letter was dated last March, and was in answer to protests from the Alberta School Trustees' Association against the delay in giving effect to this 1931 legislation.

## Cost Of Direct Relief

Per Capita Cost In Regina Is Given As \$7.50

The per capita cost of direct relief in Regina during the period from May, 1931, to April, 1932, for food, clothing and shelter, was \$7.50, according to information given recently by Hon. J. A. Mackay, Minister of Labour.

This figure which represents an expenditure of \$420,566.38, does not include administration charges, drugs, medical attention or railway fares.

An Old For All Men—The sailor, the soldier, the businessman, the workman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. It cures pain, relieves cold, drowsy wounds, subdues humors and overcomes rheumatism. It is excellent. Therefore, it should have a place in all home medicine cabinets and be amongst those taken on a journey.

When the Chinese New Year comes around, the Chinese make a point of paying their debts. Do they need further civilization?

At 425 degrees below zero some of the metals, such as silver and copper, lose their resistance to electricity and become superconductors.

Boxing matches and motion pictures are now the preferred types of amusement in Paris.

Barley In Export Trade

Production Now Amounts To Nearly

130,000,000 Bushels a Year

The production of barley in Canada is rapidly increasing and now amounts to nearly 130,000,000 bushels a year. The principal uses for barley in the export market are: Feed for livestock; malt for brewing; Rolled Barley; Barley Flour and Barley Meal; Breakfast Foods; Malt Food Products; Malt Coffee and Malt Extract; Malt Syrup; Fermented Alcoholic and Non-Alcoholic Beverages; Distilled Alcoholic Beverages and Solvents; Industrial Alcohol; Malted Rice Food; and Yeast.

A special study of the particular needs of that section of the market which the producer seeks to serve, is essential to the satisfactory development of the export trade.—Department of Agriculture, Ottawa.

## Street Named After Canadian Captain

One Of Churchill's Thoroughfares Will Be Called Remedy

One of the streets of the new town site to be opened at Churchill next spring has been named after a living Canadian, Captain J. E. Remedy of Lewis, Que. He is the only Canadian to have been given this recognition in the building of Canada's new northern port on Hudson Bay. All the other streets have been named after explorers and navigators of the north lands long since departed.

Worms, by the irritation that they cause in the stomach and intestine, deprive infants of the nourishment which they should derive from food and malnutrition is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutrition of the child is assured and development in every way encouraged.

## Trinkets Belonging To

Edgar Wallace Sold

Several Things In Collection Bought

By Late Author's Wife

A collection of jewelry which belonged to the late Edgar Wallace, novelist, brought in a total of \$1,250 in London. The sale was "by order of the receiver, Edgar Wallace sold." Mrs. Edgar Wallace bought several of the items for members of the family. An engraved gold cigarette case weighing about seven ounces brought \$175. A suite of cash- and diamond square sleeve links and two studs sold for \$400 and a platinum watch for \$165.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

## Have British Captains

Ninety per cent. of all Chinese ships

have British captains and most of them are British registry with the union jack painted all over the side to warn pirates away.

Douglas' Egyptian Liniment is unrivaled for speedy relief in muscular rheumatism, lame back, inflammation, sprains and felons.

Here's to the man who plans things—builds things—makes things. Who prattles not of wonders of old Nor glories over ancestral gold, But takes off his coat and takes hold And does things?

When you start growing at both ends and stop in the middle you are an adult.

When the Chinese New Year comes around, the Chinese make a point of paying their debts. Do they need further civilization?

At 425 degrees below zero some of the metals, such as silver and copper, lose their resistance to electricity and become superconductors.

Boxing matches and motion pictures are now the preferred types of amusement in Paris.

## Life Is Dedicated

## To War Memorial

Book Of Remembrance To Be Illuminated

By Montreal War

Memorial

A five-year task of illuminating the

Book of Remembrance which will

contain the names of the 68,000

Canadian men and women who died

overseas from August 1914 until the

dissolution of the Canadian Expeditionary

Force in 1922 is the life-work of

William Purves, who exhibited a

rough sample of the proposed Book

in the McGill University Library

here. The completed work will be

placed in a specially-built vault in the

Peace Memorial Tower in the Parliament

Buildings at Ottawa.

"The work I am now engaged on is

my life-work," said Mr. Purves

when interviewed. "If I live the next

five years to finish the job I shall feel

my life has been spent in vain."

The Book of Remembrance containing

150 leaves of the finest calf-skin

will be bound in purple

Morocco leather, mounted on solid

gold and engraved with the Canadian

Coat of Arms. The 68,000 names will

be inscribed by hand on the parchment

of the work of several men, but 15

pages will be fully illuminated by Mr.

Purves.

He intends to tell pictorially, year

by year, the story of the war; for

instance, the theme for 1914 will be

the stirring of troops by the navy,

for 1915, the pouring in of men from

every province to aid their country,

and so on. Mr. Purves also plans to

include in the illuminated pages, in

authentic scenes showing the pleasures

and pastimes of the men overseas.—Montreal Correspondent Canadian Press.

Ashtan Vietnam. The man or woman

subject to asthma is indeed a

victim. What can be more terrifying

than to suddenly be seized with

paroxysms of choking which seem

to threaten the existence of life.

From such a condition Dr.

D. Kellogg's Asthma Remedy has

brought many to completely restored

health and happiness. It is known and

prized in every section of this broad

land.

## Unemployment Measures

Relief Figures For Five Cities

Tabled In House

A total of \$2,996,140 was disbursed

to the cities of Vancouver, Calgary,

Regina, Toronto and Quebec from last

March to date under the government's

unemployment and farm relief plan,

according to a return tabled in the

House of Commons. This sum was

distributed in part in direct relief and

in public works.

The totals for the various cities

follow:

Vancouver ..... \$ 772,484.13

Calgary ..... 630,600.84

Regina ..... 334,044.78

Toronto ..... 1,008,713.44

Quebec ..... 252,297.35

Must Study Japanese

The study of the Japanese language

is made compulsory under new regu-

lations announced for all primary

schools in Fongshing province, of which

Mukden is the capital. Similar regu-

lations are being enforced throughout

Manchuria.

Cambridge, England, is to have a

new \$2,500,000 library building.

Smith—It must be nice to own a

car.

Miller—I know it should be, but

I've never enjoyed it. Either the car

is being repaired, or else I am.

Three presidents of the United

States—Martin Van Buren, Millard

Fillmore and Theodore Roosevelt—

were born in New York state.

## WORLD HAPPENINGS BRIEFLY TOLD

Actual operations on the establishment of the trans-Canada chain of airfields began on November 1.

Over 50 French language weeklies in the province of Quebec have joined in formation of the "French Weekly Newspaper Association of Canada."

Over sixty per cent of the creamery butter produced in Canada comes from two provinces, Ontario and Quebec.

Premier Benito Mussolini appealed to the United States to cancel or reduce the European war debts in an open air address at Turin, Italy.

Practising barrister and resident of Winnipeg, Man., for half a century, Henry Nelson, 76, is dead. Born in Weston, Ont., he came to Winnipeg in 1852.

Fourteen persons were killed when a floor collapsed in a house near Giza in upper Egypt while a wedding ceremony was in progress. The bride was one of the victims.

The Alberta Government and the Dominion Administration will be asked to render assistance in a scheme to provide flood control on the Bow River at Calgary.

A plague brought the names of 133 French soldiers who lost their lives during the siege of Yorktown 151 years ago, has been unveiled in Paris, France.

The Dowager Marchioness of Lansdowne, widow of the 4th Marquis of Lansdowne who was Governor-General of Canada from 1853 to 1888, died recently in London, England.

Judge Holman Gregory was appointed common sergeant of the City of London in succession to Sir Henry Fielding Dickens, sixth son of Charles Dickens.

The decision whether all Canadian wheat shipped to United Kingdom ports shall enjoy the ten-per-cent-a-bushel preference or only that shipped direct from Canadian ports is a matter for the British Government. Hon. H. H. Stevens, Minister of Trade and Commerce, said:

## Sounds Like Magic

Press Boston in High-Speed Restaurant and Food Appears

"No waiting!" is the slogan of a restaurant just opened in Prague. Diners don't wait for the waiters, for there aren't any waiters to keep them waiting. As he walks through the hall of the restaurant the customer chooses his meal from gigantic menu boards hanging on the walls. Arrived at the office, he gives his order and receives a ticket with a number upon it. He then goes to the seat bearing that number.

Down the middle of the table runs a broad travelling band, and barely has he taken his place when his first dish comes bobbing along. He removes it from the band, disposes of it, and then places the empty plates and dishes upon another band beneath the table, which moves in the opposite direction. Meantime he presses a button in a matter of seconds the next course appears. The dirty plates and dishes are carried by their band to the washing-up department, whence yet another band takes them back to the kitchen. The price of a three-course meal is about twenty-five cents, and so well the restaurant paying that its owner is talking of supplying another course for the same money.

## Deserves The Honor

Earl Byng Earned Award Of Field Marshal's Baton

General Byng had a remarkably good record as a commander in the great war and richly deserves the field marshal's baton that has been awarded to him. The Canadian expeditionary force served under General Byng, who, after the war, became governor-general of this Dominion.

When a British soldier is given the baton, he reaches the highest rank in the army, that of field marshal. The baton is a short staff presented by the King as a symbol of office. No one is made a field marshal until he is of royal blood or has rendered distinguished service.

The baton is made of silver and is decorated with the royal coat of arms.

## The Loneliest Island

Commander Limer "Carinthia" To Visit Tristan Da Cunha Next Year

Weather permitting, Tristan Da Cunha, loneliest island in the inhabited world, will be visited by the Command World Cruise liner "Carinthia" while on her journey around the world, via the southern hemisphere, early next year.

A large quantity of food supplies will be sent ashore for the lonely islanders, and the captain of the "Carinthia" will deliver a banquet to the islanders in the dining saloon of the ship.

It will be imagined with what pleasure the hundred and sixty inhabitants will look forward to seeing the "Carinthia," when it is realized that more than a year sometimes elapses without a ship calling here. When a ship called two years ago at the island, the natives said they still had plenty of canned sardines, open sals, and tins. They requested poison for rats, their only mongoose being unable to make serious inroads on the hide-outs of the rodents.

Although the inhabitants frequently become depressed over the scarcity of food and long absences of ships, they always resolve to leave the island when offered land elsewhere. They are often without mail and newspapers for a long time and their food supplies are often insufficient because the soil and the sea give them poor support.

The island is the largest and the only inhabited one of a group of three, situated in the middle of the south Atlantic, and was named after a Portuguese admiral who discovered them in 1505. The main island, Tristan, is an extinct volcano, and rises 7,640 feet above the level of the sea. The crater summit is filled with fresh water. St. Helena, 1,320 miles north, is the nearest inhabited land, while Cape Town is 1,400 miles east, Buenos Aires 2,500 miles west, and the South Pole, 3,200 miles south. Until the middle of the last century the neighboring waters were visited by American whalers, but with the decline of the whaling industry these visits ceased. The whalers have been badly missed by the Tristanians.

Five nationalities live on the island today—English, Scotch, Irish, American and Italian. They have intermarried, and of course, there are but few family names, there being four families named Glasse, eight named Green, four named Rogers, two named Swain and five named Laverlin.

The only lights on the island come from lamps filled with oil made from the blubber of sea elephants.

Strange to relate, the people like poetry.

The temperature ranges from 70 degrees down to 40 degrees.

Edinburgh, the only settlement on the island, named for the Duke of Edinburgh, who visited the island in 1867, is on a plateau nine miles long and one and one-half miles wide. The settlement is 315 years old. A system of barter prevails, but there is no money.

## FAT MAN LOSES 63 lbs.

### Kruschen and Waiking

Overweight men who want to lose a few pounds can have the benefit of some new experiences. He gives them to us for publication—

"In a little over twelve months I have reduced my weight from 227 lbs. to 164 lbs., by taking a dose of Kruschen Salts every morning for six months, and taking walking exercise every day. This remarkable achievement is all the more interesting when one considers that I did not resort to any special dieting."—G. L. Kruschen.

You can take off fat with Kruschen Salts. You may take one-half teaspoon in hot water every morning before breakfast, modify your diet, and exercise regularly.

While you are losing fat you will be gaining in energy, in endurance, in ambition. The old chair won't hold you any more—you'll want to be up and doing. You'll enjoy work and active recreation and you'll sleep like a log. You'll lose fat, and probably five years longer.

## Canadian Wheat Exports

Volume Is Much Greater This Year Than Previous Season

For the first 11 weeks of the current crop year, exports of Canadian wheat totalled 53,650,000 bushels compared with 29,453,299 bushels for the same period of last year, according to a report issued by the Dominion bureau of statistics. For the week ended October 14, the total was 8,946,756. This was a decrease of 1,000,000 bushels.

The following table shows the quantities exported and their character of exportation in the first 11 weeks:

	1922	1921
Montreal	24,931,813	11,774,077
Vancouver	13,198,374	8,012,760
Chunhill	2,724,029	2,000,000
Sorel	5,623,852	1,785,367

## An Optical Illusion

Experience Most Drivers Have When Approaching Intersection

A car coming from the right at a street intersection will always seem to be going faster than it actually is. This is an optical illusion produced by the action of your eyes and the other fellow's car arriving at the point of intersection at the same time. As the car nears the point of intersection they seem to increase in speed, when as a matter of fact they may be going very slow.

When meeting a car under such circumstances it is best to be guided by the illusion and slow down accordingly, but if caught in a situation where you are too late to avoid a collision by stopping it is well to know that the other car is not travelling as fast as it seems and that you can reach the crossing safely by speeding up a little.

Pail Whitehead defines a diplomat as a man who can give his wife a \$50 washing machine and make her forget it was a \$600 fur coat she wanted.

Champion, Alberta

Miss Rheta Campbell, who  
has been teaching near Staveland  
returned to her home Friday.  
Mr. Oviatt having recovered  
sufficiently from his recent illness  
to resume his duties at the school.

The Ladies of the Royal Purple  
have arranged to hold their  
annual New Year's Ball on  
Friday evening, December 30.  
Lon Davis and his orchestra  
will supply the music and a  
big evening may confidently  
be anticipated.

## Fatten Poultry Right on the Farm

This is the Advice Given by The  
Alberta Poultry Commissioner

According to the provincial poultry  
branch, the poultry market this year  
is poor. There has been a large carry-  
over of frozen poultry which makes  
the buyers hesitate before accepting  
shipments, unless they have a definite  
outlet for immediate consumption.  
The price of other meats is low too.  
This makes it difficult to move poultry  
meat at anything like satisfactory  
prices. It so happens, however, that  
well grown, well fattened poultry that  
will grade selected A or milk-fed is  
moving at prices that allow a margin  
of profit. It appears that unfattened  
poultry will not be worth sending to  
market.

"It is not difficult to fatten poultry  
on the farm," states George Cormie,  
provincial poultry commissioner.  
"This is especially true this year when  
grain is cheap and plentiful. Select  
well grown birds that are in fair flesh  
and place them in neat bottom crates  
or in pens. Care should be used to see  
that all birds in a pen are about the  
same size. Weaklings will be abused  
and down-trodden and possibly die.  
Grade for size, vigor and constitution,  
and keep each lot separate."

"Treat each bird for body line.  
Commence feeding lightly after twenty-  
four hours' fast. The feed, composed  
of equal parts of wheat, oats  
and barley should be finely ground  
and the coarse hulls sifted out. Too  
much hull feed will result in no gain  
in weight. Each feed should be  
mixed with milk, buttermilk or water  
one feed ahead. After the third day  
give the birds all they will eat, but  
remove the troughs after half an hour.  
Provide plenty of trough room. See  
that the litter is dry and the pen fairly  
well lighted and ventilated. When  
crate feeding is practiced, place crates  
in a quiet place, away from other  
poultry. Three weeks' feeding should  
be sufficient. Longer is usually danger-  
ous as many birds will go off their  
feed. Starve for twelve hours or  
longer and dry pick before market-  
ing."

"We wish to remind our customers  
that November is the best time for  
them to market their chickens and  
fowl."

Burns and Co. will not be sending  
their man out this year for live poultry,  
but they recommend that you  
cull your poultry and ship to them  
the best chickens etc. you have.  
They must be bled the same as turkeys,  
dry picked shipped by express.  
The U. P. R. is giving a very cheap  
express rate to Calgary, at the rate of 10  
lbs. for dressed poultry. For any  
other information, re prices, etc., see  
Horse & Co., Ltd., Champion, agent for  
Burns and Co. Ltd.

Dressed Turkey buyer will be here  
in December as usual.

### Local and General

Mrs. Collins and Mrs. Orr  
were Lethbridge visitors Tuesday

Champion's Leading Merchants

### Cool Brothers Entertain

Franklin and Delbert Cool  
entertained a number of  
Masons at dinner on Tuesday  
evening, later taking their  
guests to Vulcan where F. Cool  
gave an address. "What is  
Masonry," at the regular com-  
munication of lodge 74, A. F.  
and A. M. Vulcan.

### James Ledgerwood

Passes Suddenly

The many local friends of  
James Ledgerwood will regret  
to hear of his sudden death at  
Port Arthur on Oct. 31, at the  
age of 80. Up until two years  
ago Mr. Ledgerwood made his  
home in Champion for two  
years with his daughter, Mrs.  
G. M. Campbell.

The Ladies' Aid have decided  
to hold their annual Sale of  
work on Saturday, December  
3rd. Tea will be served.  
Watch for further announce-  
ments.

M. G. Sanford left for Medi-  
cine Hat on Thursday to look  
after farming interests there.

Rev. and Mrs. Dawson re-  
turned from High River on  
Thursday where they have been  
attending the United Church  
Conference.

The annual Chicken Supper  
under the auspices of the  
C.W.L. will be held in the  
community hall on Sat. Nov. 5  
from 5 to 8 o'clock p.m. Ad-  
mission—Adults 35c, children  
under 12 years 25c. Everybody  
come and eat and forget the  
depression.
